

Veritex Holdings, Inc. Reports Record Fourth Quarter Earnings and Strong Organic Growth

February 3, 2015

DALLAS, Feb. 3, 2015 (GLOBE NEWSWIRE) -- Veritex Holdings, Inc. (Nasdaq:VBTX), the holding company for Veritex Community Bank, announced the results today for the quarter and year ended December 31, 2014. The Company reported net income of \$1.7 million, or \$0.18 diluted earnings per common share, for the quarter ended December 31, 2014 compared to net income of \$996,000, or \$0.17 diluted earnings per common share, an increase of \$694,000 or 69.7%, for the same period in 2013. The Company also reported net income for the year ended December 31, 2014 of \$5.2 million, or \$0.72 diluted earnings per common share, compared to net income of \$3.4 million, an increase of \$1.8 million or 52.9%, for the year ended December 31, 2013.

Full Year 2014 Highlights

- Full year 2014 diluted earnings per common share increased 26.3% to \$0.72 compared to the full year 2013.
- Average loan balances increased at an annual rate of 25.9% as the bank continues to produce strong organic loan growth.
- Average noninterest deposits increased \$42.5 million or 22.5% as the bank continues to successfully generate new and expand full banking relationships with its existing customers.
- Minimal direct exposure to the energy sector as loans secured by oil and gas assets were \$6.2 million at December 31, 2014, or 1.0% of total loans, all of such loans are well collateralized with strong guarantor support.

2014 Fourth Quarter Highlights

- Completed initial public offering of 3.1 million shares, raising approximately \$40.0 million, in October 2014.
- Diluted earnings per common share increased slightly to \$0.18 compared to the fourth quarter 2013 despite an additional 3.6 million common shares outstanding in the fourth quarter of 2014.
- Net income increased \$694,000 or 69.7% to \$1.7 million compared to the fourth quarter 2013.
- Total loans increased \$108.0 million or 21.8% to \$603.3 million compared to December 31, 2013.
- Noninterest deposits increased \$32.1 million or 14.7% to \$251.1 million compared to December 31, 2013.
- Continued strong asset quality as reflected by nonperforming assets to total assets of 0.07%, net charge-offs to average loans outstanding of 0.04% and other real estate owned of \$105,000 as of and for the quarter ending December 31, 2014.
- Total deposits increased \$64.8 million or 11.3% to \$638.7 million compared to December 31, 2013.

"The fourth quarter was another record quarter for Veritex driven by strong loan fundings and continued execution of our organic growth plan," said C. Malcolm Holland, Chairman and CEO of Veritex Holdings, Inc. He added, "Our IPO capital continues to provide us with the necessary capital to achieve our plans. We continue to feel there are many opportunities for Veritex to accomplish organic and acquisition strategies."

Results of operations for the three months ended December 31, 2014

For the three months ended December 31, 2014, net income and net income available to common stockholders was \$1.7 million, compared to net income of \$996,000 and net income available to common stockholders of \$976,000 for the three months ended December 31, 2013. For the three months ended September 30, 2014, net income was \$1.4 million and net income available to common stockholders was \$1.3 million. Diluted earnings per common share was \$0.18 for the three months ended December 31, 2014, compared to \$0.21 and \$0.17 for the three months ended September 30, 2014 and December 31, 2013, respectively. Diluted earnings per common share declined \$0.03 from September 30, 2014 and increased \$0.01 from December 31, 2013 as a result of an additional 3.6 million common shares outstanding representing a 62.5% increase in outstanding shares resulting from the initial public offering in October 2014 and a \$5.0 million common equity capital raise in January 2014.

Return on average assets ("ROA") and return on average common equity ("ROE") for the three months ended December 31, 2014 were 0.86% and 6.21%, respectively, compared to 0.63% and 5.97% for the same period in 2013 and 0.74% and 7.16% for the three months ended September 30, 2014. The increase in ROA was the result of continued growth in net income from new customers, expansion of existing customer relationships and gains in efficiencies from our operating platform. The decrease in ROE is the result of a \$47.1 million or 71.1% increase in stockholders equity related primarily to new capital raise and increased retained earnings. The efficiency ratio, defined as noninterest expense divided by the sum of net interest income and noninterest income, was 62.49% for the three months ended December 31, 2014 compared to 65.87% and 67.93% for the three months ended September 30, 2014 and December 31, 2013, respectively.

Net interest income before provision for loan losses for the three months ended December 31, 2014 was \$6.8 million compared to \$5.7 million for the same period in 2013 and \$6.7 million for the three months ended September 30, 2014. The net interest margin for the three months ended December 31, 2014 decreased to 3.74% compared to 3.89% for the same period in 2013 and 3.95% for the three months ended September 30, 2014. The decrease was primarily due to a decline in loan yields as overall market yields for new loan originations and renewals were below the average yield of amortizing or paid-off loans. Additional cash primarily related to the IPO capital raise resulted in an unfavorable change to the earning asset mix and contributed to the decline in net interest margin. The average yield of interest-bearing liabilities increased to 0.73% during the three months ended December 31 from 0.70% for the same period in 2013 and 0.71% for the three months ended September 30, 2014. The increase over prior year was attributable to increased borrowing expense resulting from the private offering of \$5.0 million in aggregate principal amount of subordinated promissory notes in December 2013 and growth in interest expense related to interest-bearing deposits. Interest expense increased to \$775,000 for the three months ended December 31, 2014 compared to \$642,000 for the same period in 2013, an increase of \$133,000 or 20.7%. Interest expense increased \$43,000 or 5.9% compared to the three months ended September 30, 2014 primarily as a result of growth in retail money market accounts. The net interest margin benefited from growth in non-interest deposits as average noninterest-bearing deposits grew to \$246.9 million at December 31, 2014, a \$51.6 million or 26.4% increase over the same period in 2013 and a \$4.1 million or 1.7% increase over the three months ended September 30, 2014.

Noninterest income for the three months ended December 31, 2014 was \$656,000, an increase of \$91,000 or 16.1% compared to the same period in 2013. A rise in mortgage production and corresponding gains on loans held for sale and growth in service charge income were the primary drivers of this increase. Compared to the three months ended September 30, 2014, noninterest income grew \$26,000, primarily as a result of bi-annual dividends received on Federal Reserve Bank stock and growth in deposit service charges, partially offset by seasonal decline in mortgage sales for the quarter.

Noninterest expense increased \$470,000, or 11.2%, to \$4.7 million for the three months ended December 31, 2014, compared to \$4.2 million for the same period in 2013. The increase was primarily due to an increase in employee and director compensation, partially offset by deferred employee expense related to the volume of loan originations. In addition, an increase in professional service fees and other public company-related costs contributed to the growth of noninterest expense compared to same period in 2013. Compared to the three months ended September 30, 2014 noninterest expense decreased \$151,000 or 3.1%. Growth in compensation expense and other public company-related costs were offset by deferred employee expense related to the volume of loan originations.

Financial Condition

Loans (excluding held for sale and deferred loan fees) at December 31, 2014 were \$603.3 million, an increase of \$108.0 million or 21.8%, compared to \$495.3 million at December 31, 2013 and an increase of \$22.0 million, or 3.8% compared to \$581.3 million at September 30, 2014, primarily due to strong organic growth and successful execution of our relationship banking strategy.

Deposits at December 31, 2014 were \$638.7 million, an increase of \$64.8 million, or 11.3%, compared to December 31, 2013 due to growth in our noninterest bearing deposits and retail money market accounts. Deposits decreased \$5.8 million or 0.9% from September 30, 2014 due to a reduction in wholesale brokered deposits.

Advances from the Federal Home Loan Bank increased to \$40.0 million at December 31, 2014 compared to \$15.0 million at December 31, 2013 and September 30, 2014. The increase in advances is due to a 21-day advance offered at an interest rate of 0.10% by the FHLB which the bank took advantage of and as a result was able to reduce higher yielding wholesale brokered deposits.

Asset Quality

Nonperforming assets totaled \$541,000 or 0.07% of total assets at December 31, 2014, compared to \$2.9 million or 0.44% of total assets at December 31, 2013, and \$1.9 million or 0.25% of total assets at September 30, 2014. The allowance for loan losses was 0.99% of total loans at December 31, 2014, compared to 1.01% of total loans at December 31, 2013 and 1.01% of total loans at September 30, 2014.

Other real estate owned totaled \$105,000 at December 31, 2014 a reduction of \$1.7 million compared to \$1.8 million at December 31, 2013 and \$1.4 million at September 30, 2014 due to the sale of two properties in the fourth quarter of 2014. Nonaccrual loans were \$436,000 at December 31, 2014 compared to \$1.1 million at December 31, 2013 and \$445,000 at September 30, 2014.

The provision for loan losses for the three months ended December 31, 2014 was \$326,000 compared to \$420,000 and \$500,000 for the three months ended September 30, 2014 and the three months ended December 31, 2013, respectively. The decrease in the provision was a result of continued improvement in credit quality.

Non-GAAP Financial Measures

The Company's management uses certain non-GAAP (generally accepted accounting principles) financial measures to evaluate its performance. Specifically, the Company reviews tangible book value per common share and the tangible common equity to tangible assets ratio. The Company has included in this release information related to these non-GAAP financial measures for the applicable periods presented. Please refer to the notes to the "Selected Financial Data" table and the table in the table captioned "Reconciliation GAAP —NON-GAAP (Unaudited)" at the end of this release for a reconciliation of these non-GAAP financial measures.

(2) Except as otherwise indicated in this footnote, we calculate our average assets and average equity for a period by dividing the sum of our total assets or total stockholders' equity, as the case may be, as of the close of business on each day in the relevant period, by the number of days in the period. We have calculated our return on average assets and return on average equity for a period by dividing net income for that period by our average assets and average equity, as the case may be, for that period.

(3) Net interest margin represents net interest income, annualized on a fully tax equivalent basis, divided by average interest-earning assets.

(4) Efficiency ratio represents noninterest expense divided by the sum of net interest income and noninterest income.

(5) We calculate tangible common equity as total stockholders' equity less preferred stock, goodwill, core deposit intangibles and other intangible assets, net of accumulated amortization, and we calculate tangible assets as total assets less goodwill and core deposit intangibles and other intangible assets, net of accumulated amortization. Tangible common equity to tangible assets is a non-GAAP financial measure, and, as we calculate tangible common equity to tangible assets, the most directly comparable GAAP financial measure is total stockholders' equity to total assets. See our reconciliation of non-GAAP financial measures to their most directly comparable GAAP financial measures in the table captioned "Reconciliation GAAP —NON-GAAP (Unaudited)."

Tangible book value per common share					
(2)	8.96	7.41	7.18	6.93	6.46

(1) We calculate book value per common share as stockholders' equity less preferred stock at the end of the relevant period divided by the outstanding number of shares of our common stock at the end of the relevant period.

(2) We calculate tangible book value per common share as total stockholders' equity less preferred stock, goodwill, and intangible assets, net of accumulated amortization at the end of the relevant period, divided by the outstanding number of shares of our common stock at the end of the relevant period. Tangible book value per common share is a non-GAAP financial measure, and, as we calculate tangible book value per common share, the most directly comparable GAAP financial measure is total stockholders' equity per common share. See our reconciliation of non-GAAP financial measures to their most directly comparable GAAP financial measures in the table captioned "Reconciliation GAAP —NON-GAAP (Unaudited)."
